

Clinical Scientist (m/f)*

Reference Number: 1001429

Company Information

Our client is an emerging medical device company whose mission is to deliver superior solutions for deep brain stimulation (DBS) therapy. Their ambition is to provide a unique, high-resolution and MRI-compatible DBS system that will improve patient comfort and therapeutic outcome, initially for patients with Parkinson's disease. Its steering brain stimulation (SBS) system and image-guided programming are based upon patented technologies.

In the coming years, our client will further develop its prototype products and perform clinical validation tests; market entry is planned for 2013. The company is ambitious, dynamic and well-funded, its small and dedicated team collaborates with several world-leading clinical partners.

With offices in the Netherlands and in Germany, our client offers a stimulating work environment, a competitive remuneration package and the opportunity to develop your career in an exciting, fast growing environment.

Position

The Clinical Scientist will be responsible for clinical research activities and act as the interface to external sites and medical opinion leaders. Your main tasks will be:

Clinical research activities:

- Clinical input for specifications and product design/concept choices
- Protocol definition and writing for (pre)clinical studies
- Review from the MD perspective of (pre)clinical studies, including adverse event handling
- Training of collaborator sites for studies
- Presence during critical pre-clinical experiments and clinical tests
- Managing reporting of studies
- Publish results and present at conferences

'Outside-in' activities:

- 'Clinical marketing' to luminary clinicians/medical opinion leaders
- Report on DBS workflows different clinical sites (visits) and identify clinical needs
- Match with the company's product propositions
- Validate/adapt the product proposition with external sites

Candidate Profile

- Trained Medical Doctor, biomedical engineer, clinical scientist, with sound knowledge of neurology
- Preferably experience in/intimate knowledge of Deep Brain Stimulation
- A high energy, self-motivated and pro-active individual able to work in the fast moving environment of a dynamic start-up company
- Very good communication skills
- Able to interact with technical teams and clinical experts
- Willingness to travel 50% of time (within EU; few times US)
- Fluent in English, further languages would be appreciated
